I had a great time at the worlds, and 3rd place, not bad , considering I haven't competed in the last for years, I had lost my passion for speed and competition. But now I'm back....the next one is for GOLD.—Zaven

For 2 years I had my Linz's semifinal in my head. I was so upset missing the final for 4 hundredths of second, so this year I'd to give everything in the semifinal to make sure that I'll be in the final 8. When I saw my time on the board 7'16", I was pleased but I didn't know that will be enough to advance. I finished 3rd place in the 2nd semifinal, and top 2 place of each heat move on plus the 2 faster time. And so far I knew, I was moving on to the final, the 3rd and last heat was my main concern. I watched the race from start to finish, I was scared that the 3rd time will be faster than mine. When I saw 7'20" for the 3rd place, I was relieved and mostly happy because in the 1st semifinal the 3rd place was 7'16" like me. So both of us are moving to the final.

Since it was my first final at the world Masters, I was already happy to be there (in the final). And the only thing that I've to do now is just run to the finish lane. I ran!! And I came up 6 place, I was enjoying that place.

Next time you knows!!!

I threw the shot and came in 5th. The winner broke the world indoor record with his throws. This event was on the same day as the Pentathlon where I threw better but it would have given me the same final standing of 5th in the shot. Those throwers are BIG boys.

The Discus was postponed because of an incredible storm with winds of over 100 kms per hour. We threw the next morning with 15 minutes of advance notice. They had to break the ice off the judge's table outside and it was still windy and raining. It started to snow but we finished before they again postponed the outside events due to heavy snows. All the practice I had done in the rain and cold here in Sudbury did pay off because I took home the gold medal with a throw of only 46.59 meters. (I was hoping to go over 50 meters but the conditions were truly Canadian)
